

THE MEN OF FAIRMONT

Willow Stream The Spas At Fairmont know the score when it comes to massaging, manicuring and maintaining their male spa guests.

Willow Stream spa's pre-game plan begins with the launch of a new concept in spa for men which includes all the comforts of home: plasma screens with wireless headsets, handsome leather and wood décor, the "Bentley" of multi-tasking massage beds, the latest issues of sports magazines and business journals and even home-baked cookies.

As men become more comfortable with the idea of frequenting spas, Willow Stream experts will guide them to grasp the powerful benefits of spa relaxation and stress reduction in the privacy of their own special spa treatment room.
